Reference labels are ICD-derived administrative proxies, not physician consensus. The any-position AF proxy (75 YES/175 NO) is primary; the principal-AF proxy (4 YES/246 NO) is exploratory and too sparse for stable model ranking.

google/gemma-3-4b-it	direct	Use only the supplied deidentified MIMIC-IV record. Do not reveal reasoning. Return only YES or NO and no explanation.	Did this hospitalization involve atrial fibrillation as a documented active clinical problem? Do not count a remote history alone. Answer with a single word: YES or NO.	FALSE
google/gemma-3-4b-it	role	Use only the supplied deidentified MIMIC-IV record. Do not reveal reasoning. Return only YES or NO and no explanation.	You are a board-certified cardiologist and clinical-trial endpoint adjudicator. Determine whether atrial fibrillation was an active clinical problem during this hospitalization, rather than only a remote or incidental historical diagnosis. Answer with a single word: YES or NO.	FALSE
google/gemma-3-4b-it	structured	Use only the supplied deidentified MIMIC-IV record. Do not reveal reasoning. Return only YES or NO and no explanation.	Adjudicate whether atrial fibrillation was an active problem during this hospitalization. Classify as YES when the discharge summary supports one or more of the following: 1. New, recurrent, worsening, or symptomatic atrial fibrillation contributed to presentation or admission; OR 2. Atrial fibrillation required active inpatient rate control, rhythm control, cardioversion, ablation, anticoagulation decision-making, or other hospital-level management; OR 3. Atrial fibrillation materially affected the hospital course. Do not classify as YES for a remote history or stable problem-list mention alone. Do not infer AF from age, stroke, heart failure, anticoagulation, or tachycardia without documentation linking it to AF. Answer with a single word: YES or NO.	FALSE
google/gemma-3-4b-it	fusion	Use only the supplied deidentified MIMIC-IV record. Do not reveal reasoning. Return only YES or NO and no explanation.	Adjudicate whether atrial fibrillation was an active problem during this hospitalization. Use BOTH the discharge summary and the linked AF-management context supplied below. The linked context may include rate/rhythm-control drugs, anticoagulants, cardioversion, ablation, or electrophysiology procedures, but these are nonspecific and must be interpreted with the narrative. Do not count a remote history alone and do not infer AF from a medication by itself. Answer with a single word: YES or NO.	TRUE
google/gemma-3-12b-it	direct	Use only the supplied deidentified MIMIC-IV record. Do not reveal reasoning. Return only YES or NO and no explanation.	Did this hospitalization involve atrial fibrillation as a documented active clinical problem? Do not count a remote history alone. Answer with a single word: YES or NO.	FALSE

Do not count a remote history alone and do not infer AF from a medication by itself. Answer with a single word: YES or NO.	TRUE
Qwen/Qwen3-8B	direct	Use only the supplied deidentified MIMIC-IV record. Do not reveal reasoning. Return only YES or NO and no explanation.	Did this hospitalization involve atrial fibrillation as a documented active clinical problem? Do not count a remote history alone. Answer with a single word: YES or NO.	FALSE
Qwen/Qwen3-8B	role	Use only the supplied deidentified MIMIC-IV record. Do not reveal reasoning. Return only YES or NO and no explanation.	You are a board-certified cardiologist and clinical-trial endpoint adjudicator. Determine whether atrial fibrillation was an active clinical problem during this hospitalization, rather than only a remote or incidental historical diagnosis. Answer with a single word: YES or NO.	FALSE
Qwen/Qwen3-8B	structured	Use only the supplied deidentified MIMIC-IV record. Do not reveal reasoning. Return only YES or NO and no explanation.	Adjudicate whether atrial fibrillation was an active problem during this hospitalization. Classify as YES when the discharge summary supports one or more of the following: 1. New, recurrent, worsening, or symptomatic atrial fibrillation contributed to presentation or admission; OR 2. Atrial fibrillation required active inpatient rate control, rhythm control, cardioversion, ablation, anticoagulation decision-making, or other hospital-level management; OR 3. Atrial fibrillation materially affected the hospital course. Do not classify as YES for a remote history or stable problem-list mention alone. Do not infer AF from age, stroke, heart failure, anticoagulation, or tachycardia without documentation linking it to AF. Answer with a single word: YES or NO.	FALSE
Qwen/Qwen3-8B	fusion	Use only the supplied deidentified MIMIC-IV record. Do not reveal reasoning. Return only YES or NO and no explanation.	Adjudicate whether atrial fibrillation was an active problem during this hospitalization. Use BOTH the discharge summary and the linked AF-management context supplied below. The linked context may include rate/rhythm-control drugs, anticoagulants, cardioversion, ablation, or electrophysiology procedures, but these are nonspecific and must be interpreted with the narrative. Do not count a remote history alone and do not infer AF from a medication by itself. Answer with a single word: YES or NO.	TRUE
Qwen/Qwen3-32B	direct	Use only the supplied deidentified MIMIC-IV record. Do not reveal reasoning. Return only YES or NO and no explanation.
